

## Corporate Sustainability Policy

---

The environmental, social and corporate governance aspects of the KBS Corporate Sustainability Policy are rooted in the tenets of:

- Effective risk management & constant process improvements
- Abiding by “Zero-Accident” principles in matters of pertaining occupational Health & Safety
- Improving the company’s performance & production efficiency
- Encouraging active employee participation & fostering open communication
- Making efficient use of energy while protecting environmental balances & natural resources
- Increasing stakeholder knowledge & communication awareness of climate changes issues
- Adhering to a sustainable environmental management policy that is grounded in national environmental laws & regulations, applicable environmental standards, and the best available technologies for dealing with such matters
- Ensuring information security & business continuity in the conduct of all operations
- Complying with the requirements of national and international laws & regulations
- Managing stakeholder relations transparently & with common sense
- Ensuring continuity in customer satisfaction
- Improving supplier’s own sustainability practices
- Behaving transparently when dealing with the public at large on matters of involving sustainable environmental policies & practices
- Making stakeholder aware of the company’s corporate social responsibility activities, strategies, objectives and priorities
- Making adherence to ethical values, combatting corruption and all other corporate governance principles part of the company’s corporate culture

The company’s corporate governance structure, risk management, business ethics & anti-corruption rules, sustainability management, and stakeholder engagement approaches are all matters of concern when dealing with governance & sustainability issues.

Besides efforts aimed at the development and ongoing conduct of corporate governance activities within the company, all due attention is also given to ensuring that the company’s external stakeholders are likewise involved in achieving the same aims.

In keeping with this, ensuring the sustainability of all of the company’s corporate activities when treating all stakeholders equally, disclosing information responsibly & abiding by corporate governance practices is one of the company’s fundamental objectives
